## ■ 备注 Notes

1. 除特殊说明外，上述所有参数的测试条件都在室温=25°C，湿度 < 75%RH，输入230Vac和额定负载时测得。  
Unless specially mentioned, all above parameters are measured at ambient temperature 25°C, humidity <75%RH, 230Vac input and rated load.
2. 电网调整率是在额定负载条件下从低电网到高电网的输出电压变化率。  
Line regulation is the output voltage change rate from low line to high line at rated load.
3. 负载调整率是负载电流从额定负载的10%到100%变化时的输出电压变化率。  
Load regulation is the output voltage change rate from 10% to 100% rated load.
4. 纹波和噪声的检测是用20MHz带宽示波器，从被测电源的端口连接一根长30cm的20AWG (0.5mm<sup>2</sup>) 屏蔽双绞线，且在绞线末端并接上0.1uF 高频电容和47uF电解电容后测得。  
Ripple & noise are measured by an oscilloscope at 20MHz of bandwidth, using a 30cm 20AWG (0.5mm<sup>2</sup>) twisted pair-wire connected to the power supply, terminated with a 0.1uF high-frequency & 47uF electrolytic parallel capacitor.
5. 当工作海拔高于2000米时，操作温度须调降5°C/1000米。  
The ambient temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m.
6. 开关电源被视为用户整机的一个部件，整机是否符合EMC指令还需重新测试并验证。  
The power supply is regarded as a component which will be installed into the final equipment. The final equipment must be re-confirmed that it still meets EMC directives.
7. 开关电源作为用户设备的部件，用户在选择开关电源时须注意，应选择符合设备应用场景和标准的开关电源。如在中国境内对于有3C强制认证要求的应用，用户应选择有3C认证的开关电源；当在其他国家和地区使用时，也应根据当地的法律法规要求，选择符合相应法律法规标准认证的开关电源。若用户不了解如何选择，可告知我们其设备应用场景和要求，我们可协助用户进行选型。  
As switching power is a component of an equipment or device, during their applications, the final users should select a proper model in according with the real application's circumstances and criteria. For instance, in Chinese Mainland for the applications which have compulsory request on CCC approval, the final users have to select CCC certified models. On the other hands, for the applications in other countries or regions, the final users have to select a proper safety certified model which complies with both the local laws and industrial regulations. When users have confusions or have no idea in model selection, you are welcome to send your inquiry. We will recommend you the matching models based on your specified requests and application fields.
